First RAMP Transnational Joint Call 2026 now open for applications

The first Joint Transnational Call under the Raw Materials Partnership for the Green and Digital Transition (RAMP) is now open. The call will support transnational research and innovation projects across the raw materials value chain.

Raw materials are essential for the green and digital transition. They are needed in technologies such as batteries, renewable energy systems and advanced manufacturing. At the same time, growing demand, vulnerable supply chains and geopolitical uncertainty have increased the need for sustainable, resilient and circular raw materials systems.

Backed by nearly €40 million in funding commitments, the call supports collaborative projects that contribute to secure, sustainable and resilient raw materials systems.

New funding opportunities for research and innovation

The call supports collaborative projects that contribute to sustainable and resilient raw materials systems for the green and digital transition. Funding is provided through coordinated national and regional programmes with a shared international evaluation process.

Who can apply?

The call is open to transnational consortia involving eligible organisations from participating countries, including academia, industry, research organisations and other relevant stakeholders.

Key facts

- Nearly €40 million in indicative funding
- Six call topics
- Two-stage application process
- Pre-proposal deadline: 22 September 2026

Potential applicants are encouraged to review the call documents, identify partners and begin preparing their international consortia early.

For full information on eligibility, participating funders, call topics and application procedures, visit the [RAMP Joint Transnational Call 2026](#) page.

RAMP builds on the legacy of ERA-MIN while significantly expanding the scale of transnational cooperation and funding. Over its lifetime, the partnership is expected to mobilise approximately €350 million for research and innovation on raw materials, including €90 million from Horizon Europe.
